## 🎓 EDUCATION

### BSc Computer Science in Software Engineering

Esoft Metro Campus

09/2024 – present | Bambalapitiya, Sri Lanka

### HND Computer Science

ESOFT Metro Campus

03/2023 – 09/2024

Bambalapitiya, Sri Lanka

-Merit

### G.C.E A/L in Physical Science

Hindu College Colombo

Bambalapitiya, Sri Lanka

Com.Maths C | Physics S | Chemistry S |

English C

## 📜 CERTIFICATES

- Linux Tutorials
- Python Fundamentals for Beginners
- Java Programming for Beginners
- Diploma in English

## 👤 PROFESSIONAL SUMMARY

Motivated and detail-oriented final-year Computer Science undergraduate with hands-on experience in software development, web technologies, and database systems. Passionate about solving real-world problems through code, and known for a strong work ethic, adaptability, and collaborative mindset. Eager to contribute innovative ideas and technical skills in a dynamic team environment to deliver impactful solutions.

## 🧠 SKILLS

- Familiar in Java, Python, PHP, HTML, CSS, and JavaScript also Linux environment.
- Experience with React.js, Node.js, MySQL, and Android development (Kotlin, Java).
- Strong understanding of OOP concepts and version control using Git/GitHub.
- Excellent leadership, time management, and communication skills.
- Adaptable, quick learner, and effective under pressure in both team and solo projects.

## 📁 PROJECTS

### 🌐 My Portfolio - HTML, CSS, JavaScript

Designed and developed a personal portfolio website featuring sections like Home, About, Projects, and Contact. Fully responsive and deployed via Netlify to showcase skills and personal brand.

### 🛒 Banitha Tex - Full Stack Web App

React JS, Node.js (Express), MySQL

Developed a full-stack e-commerce platform for Banitha Tex as my final year project, enabling dynamic product customization, real-time price updates, and secure order processing. Implemented low-stock alerts, role-based access control, and responsive design to ensure scalability, data accuracy, and an enhanced user experience.

### 🍕 Pizza Ordering System (CLI) - Java

A command-line based application that allows customers to place pizza orders, customize toppings, and view receipts. Implemented OOP principles, Design Patterns and input validation.

### 🛒 Sampath Food City System (CLI) - Python

Developed a Python-based CLI tool to manage supermarket sales and analyze branch-wise performance. Focused on file handling, modular coding, and efficient data processing.
